AETNA GROUP

<http://www.aetnagroup.com/IT/>

47826 Villa Verucchio (RN)

It boasts approximately 900 employees, 9 subsidiaries (France, UK, Germany, USA, Russia, China, Spain and Brazil) and 5 production facilities in the Packaging Valley in Italy, 1 in Brasil and 1 in the USA. It operates in more than 120 countries and provides global customer service.

Sales income are 200 million Euro, generated by five brands: ROBOPAC, ROBOPAC SYSTEMS, ROBOPAC PACKERS, IMSB ROBOPAC E TOPTIER ROBOPAC. The Group invests more than 4% of income in R&D

Aetna Group, is the world leader in the packaging sector, specialised in end-line solutions. Specifically, Group production ranges from semi-automatic wrapping machines with smart technology to innovative automatic solutions, from industrial wrapping machines to shrink wrapping machines and cartoning machines, to tailor made packaging solutions. In order of priority, Aetna Group has always put the customer first: becoming a partner and not just a vendor is an additional step that strengthens its full customer satisfaction orientation. In association with the most important consulting firms (including Deloitte, Porsche Consulting, TUV, etc.), the company is also significantly investing to optimise production processes (lean production) and management processes (SAP) to improve productivity and the sustainability of a competitive business advantage.

SACMI

<https://www.sacmi.com/en-us/food-beverage>

Imola - Bologna

SACMI TECHNOLOGIES FOR FOOD & BEVERAGE

SACMI designs and manufactures machines and complete plants, developed on the basis of the specific needs of each individual customer, sector and market.

SACMI, YOUR ONE-STOP PARTNER FOR THE BEVERAGE WORLD

SACMI is the only company in the world equipped to control every step of the Beverage production line, from pellets to pallets. Thanks to a complete and integrated system engineering organisation, it is able to offer specifically targeted answers to the individual needs of each customer/market, with solutions developed alongside its partners and in synergy with its own R&D workshop, a structure designed to support customers right from the design phase and certified by the top international players in the sector.

FORM-FILL-SEAL (FFS) AND COMPRESSION BLOW FORMING (CBF)

Available in hygienic, ultra-hygienic and aseptic versions, SACMI FFS (form-fill-seal) packaging machines reflect the state of the art of the dairy product packaging industry, thanks to high production speeds, versatility in the management of different formats, and possibility of managing new concept containers with an attractive design. The high technological level reached by SACMI FFS over the decades has been further confirmed by numerous international awards, including the aseptic packaging of dairy products certified since 1986 by the US Food & Drug

Administration. The ability to extend the intrinsic superiority of compression technology to new sectors - underlying SACMI's global technological leadership in the Closures industry - characterises SACMI CBF, the new precise, versatile and cost-efficient SACMI platform that brings together the best features of alternative technologies such as EBM, IBM and ISBM. Thanks to high thermodynamic stability throughout the process, the absence of an injection point in the bottom part of the containers, and to high productivity and neck precision, CBF is the ideal solution for the dairy world. Ample flexibility in the use of the different resins is combined, with CBF, with the possibility of producing blown containers cost-effectively (up to 20% less in weight without any negative impact on performance).

COMPLETE SOLUTIONS FOR CHOCOLATE & CONFECTIONERY

A several decades-long tradition of expertise and know-how makes of SACMI the ideal partner for the Italian and international confectionery industry. Advanced solutions for moulding chocolate and other cocoa-based products are combined with complete lines for primary and secondary packaging of chocolate and bakery products. A range that extends to wrapping solutions and systems for automatic product handling. High performance, versatility, and compact footprint make SACMI's range ideal both for high-capacity lines and for smaller workshops.

OCME

https://www.ocme.com/en?_ptc=4

43122 - Parma

A FULL RANGE OF TECHNOLOGY AND INNOVATION.

OCME manufactures **primary and secondary packaging machines including fillers, end-of-line and logistic machines for different sectors**

(Beverage, Food, Detergent, Petro-chemical and Tissue).

OCME is not a product provider but a **solution provider, anticipating trends through innovation.**

Service & Support

OCME provides a wide range of **services**, focused on **assisting and helping you after the purchase** of your machine.

We carefully listen to our **customer's requests** and questions to tackle each issue by proposing the **best solution**. There are different activities we can provide, on-site or remote technical support thanks to the use of high technology tools. Activities such as spare parts supply, upgrades installation, service contract and more.

Our services are all designed with the aim of **satisfying our customers' needs** and build a long-lasting relationship based on mutual trust and cooperation.

Responsiveness, proactivity and proximity are some of the values in which we believe, the main principles we follow to fulfill our mission and help you reach your goals.
